

PAPER PLATE CHRISTMAS TREE

craft activity

1. Take one of each of the two sizes of plates. Fold them in half both ways so you make quarters.

2. Cut down the lines so you end up with 4 quarters of each plate.

3. Take two quarters from the large plate and one quarter of the small plate top construct your tree (the small quarter goes at the top).

4. Paint each section the colours you like. We've chosen green poster paint, but we've made some variations of the green by adding some yellow and/ or white for some different colours. Paint with strokes, or dab for a leafy looking result.

5. Once the paint is dry use glue to attached the 3 pieces, overlapping the layers so you have a three layer Christmas tree.

6. Now to decorate! We've made some suggestions here of some craft items you can use, but let your imagination run wild. Glue your accessories on and voila!

What you'll need:

Paper Plates Uncoated
17.5cm Pk50
PP175

Paper Plates Uncoated
23cm Pk50
PP230

Basics Buttons Xmas
Colours 600g
BUTCHR

Christmas Rhinestones
